

## *Auto Label Shrinking Machine JND-100*

The shrinking machine gets the water supply from the bottled water. The float electric water level controller presets a figure, then water in the tank will be heated, when temperature up to the preset figure (4-7 degree adjustable), When the temperature of steam reaches to 140-170°C the machine starts to work.

### **Specification**

Model	JND-100
Production capacity	3000-9000BPH
Input voltage	3-phase, 380/220 AC
Input power	20KW
Applicable diameters of bottle body	28 to 300 mm
Applicable diameters of bottle neck	28 to 100 mm
Applicable lengths of label	30 to 55 mm
Applicable thicknesses of label	0.03 to 0.13mm
Applicable internal diameters of paper tube	5 to 10ft (adjust it at will)
