

## *Automatic High Lid Capping Machine Plastic Cover Capper*

### **Brief Introduction**

- Stainless steel structure.
- PLC control, touch screen display, easy to operate.
- Automatic unscrambling and feeding deep cap.
- With different toolings, this machine can be used to feed and press all kinds soft plastic lids.

### **Technical Specification**

- Capping speed: 30 – 40 cans/min
- Can specification:  $\phi$ 125-130mm H150-200mm
- Lid hopper dimension: 1050\*740\*960mm
- Lid hopper volume: 300L
- Power supply: 3P AC208-415V 50/60Hz
- Total power: 1.42kw
- Air supply: 6kg/m<sup>2</sup> 0.1m<sup>3</sup>/min
- Overall dimensions: 2350\*1650\*2240mm
- Conveyor speed: 14m/min
