

Automatic Bottle Wrap Around Case Packer Machine WJ-LGB-15

LLGB - 15 type automatic wrapping case package machine is my company on the basis of digesting and absorbing foreign advanced technology, combined with China's national conditions, developed with independent intellectual property rights, widely adapted to the packaging industry, efficient, environmental protection of a new generation of carton packaging machinery. The machine and the machine can provide packaging form, compared with similar traditional packaging methods.

In short, application of automatic wrapping machine, reduce labor intensity, reduce the labor resources, reduce the production process, its superior comprehensive performance index and economic benefits, has been accepted and widely recognized by society, will be to upgrade the traditional manner of packing and inevitable development trend.

Specifications:

Type	WJ-LGB-15
Power supply	220/380V, 50/60HZ, 10KW
Air pressure	0.5-0.7MPA
Machine size	L5000-6000*W2200*H2000mm
Carton size	L200-500*W150-500*H100-350mm
Packing speed	8 cases/min
Glue solidify time	2-3 sec
Height of Platform	650+-50mm
PLC	Siemens
Touch screen	Siemens
Optoelectronic switch	P+F
Electrical magnetic valve	AIRTAC
Pneumatic element	AIRTAC /SMC/ FESTO
Hot Melt system	NORDSON
