

Bottled Water Production Line CGF-series

The machine is mainly used for washing, filling, sealing non-carbonated drinks such as mineral water, pure water, wine drink. The machine design shortens the time for the drink material contacting with outside, increases the sanitation condition, capacity and economy benefit.

Capability Character

It adopts hanging type of bottle-conveying structure to make bottle model changing more convenient and faster. The main machine adopts advanced PLC control technology. The key electric pieces are all international famous brands.

Technical Parameters

Model	CGF12-12-6	CGF18-18-6	CGF24-24-8	CGF32-32-10
Heads of Washing,Filling,Sealing	12-12-6	18-18-6	24-24-8	32-32-10
Production Capacity (Bottle/Hour)	2000-4000	5000-7000	8000-12000	12000-15000
Suitable Bottle Diameter (mm)	Φ=50-110 H=170 330-2250ml			
Spraying Pressure (Mpa)	0.2-0.3			
Motor Power (kw)	2.2	3	4	5.5
Overall Dimension(L×W×H)	2000×1500×2500	2600×1920×2550	3100×2300×2800	3800×2800×2900
Weight (kg)	2000	3500	4500	6500
