

XLRCGS-4 4 Cavity Semi Automatic PET Plastic Bottle Blowing Machine

The 2000BPH 20L Blowing Machine is equipped with powerful high-pressure clamping force and double crank connecting rod, which can lock the mold. Safe, reliable and unique valve position design makes the air pressure diagram of the machine easier to understand. Compared with ordinary product on the market, it also has the advantage of low cost, high efficiency, easy operation, convenient maintenance, etc. The tubular plastic parison obtained by extrusion or injection molding of thermoplastic resin is placed in a split mold. After the mold is closed, compressed air is passed into the parison to the inner wall of the mold.

The 2000BPH 20L Blowing Machine can be widely used in beverage, medicine, cosmetics, food and chemical industries due to their light weight, low cost, and high safety.

Technical Parameters:

Model	XLRCGS-4	
Theoretical output	2000-2400 pcs/h	
Finished bottle	Max. bottle volume	20L
	Max. neck diameter	38mm(Φ20 ~ Φ55)
	Max. bottle height	1000mm
Mold specifications	Cavity	4 cavity
Electrical system	Power voltage	380v/3Phase/50HZ
	Installation power	206kw

	Actual power consumption	190kw
Air source	Recommend air compressor	8m ³ /min 30Kg
Cooling water	Recommend water chiller	10HP
Blower size	Length*width*height/weight	3640mm×3080mm×3620mm/1500kg
		(2 sets)
