

PZB-350F Automatic High Speed Reciprocating Flow Packing Machine

This machine is mainly suitable for the packaging of bulk items in the pharmaceutical and food industries such as large honey pills, tablet blisters, capsule blisters, etc.

Compared with manual packaging, it saves more than 20% of the cost, and can be produced in conjunction with automatic blister packaging machines, automatic cartoning machines and other machines.

Feature

1. Servo motor control, bag length can be set and cut precisely, saving time and film.
2. Imported touch screen, easy setting value of machine.
3. PLC controller system and touch screen display
4. Fault detecting, which is shown on the screen.
5. Import brand photoelectric sensor track color mark high sensitive. No need to set the length of bag, intelligent cutting length.
6. Side sealing by hob, much higher speed.
7. PID digital temperature controller for perfect wrapping.
8. The conveyor is stainless steel to meet food safety.

Technical Data:

Type	PZB-350F
Film roll width	350mm
Film roll diameter	380mm
Packaged length	70-200mm
Packaged width	25-125mm
Packaged height	≤50mm
Production capacity	5-180bag/min
Electric supply	380V,60HZ,1Φ
Power	7.8Kw
Machine dimension(mm)	4000*1180*1450mm
Machine weight	600KG
