

Automatic Water-bath Leakage Tester

Brief Introduction:

Automatic Water-bath Leakage Tester is used for detecting various aerosol products, is not limited by can body materials, and can continuously detect the products completely. Pressure in cans rises due to soaking in hot water, and individual aerosol cans with poor pressure resistance will be leaked, deformed or burst, thus being removed.

Parameter:

Technical parameter	
Production capacity	3000-4200 cans/hr
Main driving head power	1.1kw
Water heating power	33kw
Type of electric control box and heater	Explosion-proof
Temperature control accuracy	±1°C
Air source	0.6Mpa-0.8Mpa
Maximum air consumption	0.6 M ³ /min
Water tank capacity	1.2m ³
Weight	about 1000kg
Dimension(L×W×H)	20000×1500×2100
