

Bottle Feeding Conveyor

The automatic bottle feeding conveyor allows automatic feeding of a wide range of products (bottles, vials, jars, buckets, cans, etc.). One pack of bottles is fully taken down from the pallet package to load on the table, big storage of several packs in one time, only one worker can operate it easily. Compared with turntable, it deeply reduce the labor and increase the production efficiency. The conveyor table adapts to the speed of your automatic filling packaging line and/or automatic labeling.

The automatic loading / unloading conveyor table has been designed to handle a wide range of products and formats: food processing (jam jars, honey, canned vegetables / prepared meals, cans, etc.), cosmetics (cream jars, soap bottles, etc.), chemistry (cans / detergent bottles, cleaning product cans, etc.) paint and varnish (paint buckets, varnish jars / cans, etc.).

This complementary solution adapts to all filling and labeling machines
