

JLG12 Lipstick Filling Machine with Protective Shield

The machine is designed for kinds of lipstick, suitable filling for metal mould lipstick, and available to customize switching into 10 nozzles and fill silicone mould lipstick as well. The color of protective shield is changeable.

Features

- ◆ 20L Heating tank adopts dual jacket layer design. The temperature and stirring speed are adjustable.
- ◆ Fill 10 pcs each time with 10 nozzles.(can be switched into 12 nozzles).
- ◆ Piston filling system is driven by servo motor with numerical control. rotary valve is driven by air cylinder.
- ◆ Stirring device is driven by motor.
- ◆ Mould lifting function is driven by step motor and numerical control.
- ◆ Color human-machine touch panel interface and Omni bearing numerical control. Operation is easy and precise.
- ◆ Filling precision is $\pm 0.1\text{g}$.
- ◆ Can fill irregularity bottles.

Technical Parameters

Outer dimension	1650*1050*2200MM
Voltage	AC220V, 60Hz, 1PH, 20A, 3.8KW
Air pressure	4~6 kg/cm ²
Filling Volume:	7ml(Max. can be 15ml)
Output	6-10 moulds/min (72~120 pcs), According to the size of vessel.
