

## ***DR-2015T Automatic Plastic Tube Filling Sealing Machine for Liquid***

### **Features and Advantages**

1. Function: Filling, Sealing, Counting, Date Printing.  
Automatic detection: No tube no filling/no sealing/no counting
2. Auto rotary table six working stations for filling sealing, more efficient.
3. Anti drip filling machine to filling the 5 strips tubes at the same time, make the filling more accurate.
4. Adopt digital ultrasonic machine, stable output and performance, turely auto-tuning.
5. Machine body of stainless steel, meet with GMP requirement
6. PLC/HMI control, English Interface Touch screen, simple operation and parameters setting
7. This machine is sealing by ultrasonic, fast and nice looking, energy saving.
8. Main parts adopt imported components, Japan and Taiwan
9. Can connect the filling tank directly. More convenience use PLC to operate and adjust the filling weight.
10. Suitable for all kinds of plastic tubes, composite tubes, PE tubes.

### **Advantages:**

Compared with traditional type heat sealing method, the ultrasonic tube sealing has the following advantages:

- \* Fast Sealing, save time
- \* Sealing is nice looking, no plastic melting overflow
- \* Lower power consumption, energy saving

**Functions:**

1. Ultrasonic Sealing
2. Cutting (trimming)
3. Mark Searching
4. Batch No Coding
5. PLC/HMI control, English/French/Espanol interface as request
6. 6 tube stations
7. Stainless steel body, Meet with GMP requirement
8. Meet with CE requirement.

**Technique parameters**

Model No.	DR-2015T
Ultrasonic Power Output	2600W
Frequency	15KHz
Voltage	AC 110/220V, 50/60Hz
Filling Range	0.5-15 ml
Filling Precision	$\leq \pm 1\%$
Delay Time	0.01-2.99 S
Sealing Time	0.01-2.99 S
Hold Time	0.01-2.99 S
Horn Journey	75 mm
Driven Model	Pneumatic
Operation Mode	PLC/MHI
Weight	460 KGS
Dimension	L*W*H 1310*1050*1760 mm
