

Syrup Production Line

This syrup production line is specially designed for washing, drying, filling, sealing, and labeling 30-500ml liquid bottles like syrup bottles. And this production line is a linkage one of ultrasonic washer, unscrambler, high temperature tunnel oven, filling machine, sealing machine and adhesive labeler. Those machines can also be used independently.

Machines of this production line should adopt box packaging and container transport.

Features:

1. Computer touch screen joint control and ordinary electrical appliance control have been designed for this production line. With rational structure and high automation, this line can deal with a wide variety of liquid bottles with different specifications.
2. Easy to assemble and convenient for maintenance.

Note: Enough attention should be paid to the connection and coordination of the whole production line while installing and debugging.

Parameters

Bottle Size	30~500ml glass bottle or plastic bottle
Production Capacity	bottle/hour
Power	<60KW
Electric Supply	380V/50hz, 3phase
Size	18000×2100×1900 mm

Output Volume	6 heads	8 heads	10-12 heads
30~100ml	3000-3600	4000-6000	8000-12000
100~250ml	2000-3000	3000-6000	6000-7500
250~500ml	2000-2500	2500-4000	5000-6000
