

JG-12Z Fully Automatic Flow Filling Machine

Description

This fully automatic filling machine is designed and manufactured using the latest domestic technology,

Made entirely of stainless steel, meeting hygiene standards,

It has the advantages of fast filling speed, wide filling range, and high filling accuracy.

And this filling machine adopts a computer automatic control system, with full touch screen control,

The production process is safe, hygienic, easy to operate, and convenient for manual and automatic switching.

Features:

1. Using a card bottle mouth device, after accurately positioning the filling bottle mouth, the filling head is inserted into the bottle to achieve filling.
2. Easy to adjust the filling volume, easy to operate, and can quickly replace bottles of different specifications for filling.
3. The whole machine is designed according to GMP specifications.

Main technical parameters:

1. Filling range: 50-5000ml
2. Number of filling heads: four heads, six heads, eight heads, twelve heads, sixteen heads
3. Filling accuracy: $\leq \pm 2\%$ standard filling volume
4. Compressed air pressure: $\leq 0.6-0.7\text{Mpa}$
5. Gas consumption: 15m³/h
6. Power supply: 220/380V 50Hz
7. Electric power consumption: $\leq 2\text{KW}$
8. Net weight: $\leq 800\text{kg}$
