

SUNHAN

Full Automatic Fabric Softener Laundry Detergent Refillable Spout Pouch Bag Filling Capping Machine Packaging Machine

This mono-block filling machine is designed for filling thicker liquid/paste into spout pouch and tighten bag caps. The touch screen control panel can makes the machine is more convenient to operate. It is suitable for laundry detergent, drinks packaging. The reasonable design gets a lot of popularity from beverage, daily chemical industries.

Main Feature

- ▶ Feed pouch, fill liquid or paste, feed and tighten caps at one machine, saving working space.
- ▶ This machine can be customized according to production need.
- ▶ Filling work is controlled by servo motor, it has higher filling accuracy.
- ▶ Using servo motor to control capping structure, this ensures the adjustability and consistency of the capping work.

Parameter

- Voltage: 220V/110V 50-60Hz
- Power: 1.5kW
- Filling Range: 200-3000ml (Can be customized)
- Production Capacity: About 22-36 pcs/min (depending on materials and pouch size)
- Filling Accuracy: $\pm 0.5\%$
- Hopper Capacity: 50L(Can be customized)
- Suitable Cap Diameter: Can be customized
- Suitable Pouch Size: Can be customized
- Air Pressure: 0.5-0.8MPa
- Air Consumption: 0.1m³/min
- Memory Function: Available
- Machine Weight: About 800kg
- Machine Size: About 1865*2060*2200mm (L*W*H)
