

DPH-260 High Speed Blister Packaging Machine

Suitable for blister packaging of medicines and tablets. Grand hot-selling blister machine series.

Features

1. High-precision worm gear reducer with large torque and increased service life.
2. Equipped with air pressure and water pressure controllers. When the pressure value is lower than the set value, the display screen will display the fault and alarm and stop.
3. The main station bearings are all imported from Japan NSK brand.
4. Solenoid valves, vacuum valves, etc. are all imported from Japan SMC brand.
5. Multiple sets of silicone disc brushes are used to effectively improve the feeding rate. In view of the difficulty of feeding special-shaped pieces, this structure can increase the filling rate of medicines by 20-30%.
6. The steel character printing method is hot extrusion, and heating the steel character plate makes the printing clearer and more efficient.

Specifications

Punching speed (aluminum-plastic):	60-100 times/min
Maximum forming area:	(240~360) ×240mm
Maximum forming depth:	14mm
Power supply and total power:	Three-phase five-wire 380V 50HZ (220V 60HZ) 20~24KW
Gas consumption:	0.06~0.09m ³ /min (0.6~0.9Mpa)
Machine weight:	4000~5000Kg
Machine dimensions:	6350×1500×2000mm
