

DG-005 Ointment Filling Machine

This ointment-filling machine is an automatic tube-filling machine developed by Grand Group, capable of filling cylindrical aluminum tubes and composite tube types.

Features

Versatile Filling Capacity: Handles a standard filling range of 5-250 ml with an output of 80-120 tubes per minute, ideal for various production scales.

High-Quality Components: Integrated with Siemens and Omron electronic components for reliable and consistent performance.

Enhanced Efficiency: Equipped with double feeding and dual storage tanks, making it suitable for large-scale daily chemical factories.

Comprehensive Automation: Fully automatic filling, packaging, and sealing process with built-in emergency braking for user safety.

Specifications

Model:	DG-005
Tube material:	Aluminm,Plastic
Tube seat quantity:	40/Site
Tube diameter:	φ13-φ32(Aluminum Tube)/φ13-φ50(Plastic Tube)
Weight:	1500kg
Dosing Range:	5-250ml
Output:	80-120 tube/min
Mator power:	2.2KW
Dimensions:	2350*1300 * 2200mm
