

DGN-2 Main Machine + Sugar Coating Ball

DGN-2 Main Machine + Sugar Coating Ball. Coating ball adopts a linking gear to connect all kinds of coating balls and the driving main engine, facilitating operators to produce coating materials uniformly in a correct angle. It is possible to equip with an electric air heater with a fixed pole above the ball, to drying promptly.

Technical Parameters:

Model		DGN-2+Sugar Coating Ball
Rotating Speed		0-120 r/min
Accessory Capacity		10 L
Power		220V/50Hz/0.37Kw
DGN-2	Packing Size	520×420×530 mm
	Packing Weight	120 Kg
Sugar Coating Ball	Packing Size	50×60×70 mm
	Packing Weight	10 Kg
