

Automatic Blister Packing Machine DPT-70B

Automatic machines for the packaging of tablets in blister pack used for the packaging of different sizes of containers with honey, coated tablets, capsules and vitamin. Due to its size, it can also be used in plastic-packaged in aluminum blisters and aluminum packaging for chocolates, small computer parts, etc. Currently, equipment is widely used in the pharmaceutical, hospital and college laboratories and worksites for testing of small engines.

Characteristics:

1. Automatic equipment for the packaging of tablets in blister is characterized by reliability and refinement of packaging, as well as the compact structure.
2. It is convenient and portable, and also meets the requirements of GMP.
3. Equipment for the packaging of tablets has a high degree of automation and easy dismantling and maintenance.

Specifications:

| | |
|----------------------------------|--|
| Cutting frequency (cycles/min.) | 20-40 |
| Performance (blisters/hour) | 2400 (for a standard 80 × 57 blisters) |
| Max. forming and depth area (mm) | 80×100×26 (Standard 70×90×14) |
| Stroke (mm) | 20-100 (It can be made to order) |
| Air pressure (MPa) | 0.4-0.6 |
| Standard plate (mm) | 80×57 (It can be made to order) |
| Power (kW / V / Hz) | 380V / 220V 50Hz 1.8 kW |
| Main motor power (kw) | 0.55 |
| Rigid PVC sheets (mm) | 0.15-0.5×80 |
| Punching aluminum tape (mm) | 0.02-0.035×80 |
| Dialysis paper (mm) | 50-100g×80 |
| Cooling molds | Tap or wastewater |
| Overall dimensions (L×W×H) (mm) | 900×460×890 |
| Weight (kg) | 350 |
