

Automatic capsule filling machine PEW 70

The efficient way for Pharma Cartoning.

PEW 70 is a compact fully automatic capsule filling machine that can fill powder / pellets into hard gelatin capsules. The machine works on Tamping principal. The powder is formed into a slug and is delivered to the body of capsule. The auto capsule filling machine is designed to give output of 70,000 capsules per hour with high filling accuracy and can fill capsule sizes 00,0,1,2,3 & 4 The actual production depends on the quality of capsules, characteristics of the filling powder / pellets and humidity condition. The capsule filling machine is made as per GMP standards. Contact parts are Stainless Steel 316 & other parts are covered with Stainless Steel 304

Salient Features of Capsule filling Machine

1. Compact design, covered with Stainless steel 304, acrylic doors with micro switches
2. Temping system for Powder Filling with accuracy of + 3%
3. Speed & other setting can set on Touch screen HMI
4. Gauges are provided for easy change over

Technical Specification of Auto Capsule filling machine

Output	70,000 capsules / hour
Main Drive	3 Phase, 1.5 HP, 380/440V, 50 Hz
Powder Feeder	3 Phase, 0.25 HP, 380/440V, 50 Hz
Dust Extractor	3 Phase, 2 HP, 380/440V, 50 Hz, 125 CFM
Vacuum	3 Phase, 3.00 HP, 380/440V, 50 Hz
	1000 Ltrs/min, 30CFM, 500mm – 20” of Hg.

We are one of the leading manufacturers of Capsule filling machine, exporters of Capsule filling machine & Suppliers of Capsule filling machine in India.
