

LWA 120 Universal Labeller

We have combined German and Israeli engineering excellence to provide the perfect solution for applying different types of labels to a multitude of container shapes.

Using the HERMA (Germany) rotary labelling applicator model H400 Premium, engineered for SA's LWA Series has resulted in a robust, low-maintenance and built-for-life range of machines with a stunning, better than one third of a millimetre accuracy at speeds of up to 120m/min.

FEATURES

- Container type: Flat, oval, cylindrical or conical containers.
- Labeller type: Can apply front and back, wraparound or tamper evident labels to flat (no orientation), and/or oval products(orientation needed)
- Label type: Self-adhesive (PS)
- Speeds up to 120ppm

GENERAL TECHNICAL CAPABILITIES

- Throughput: 120 products per minute.
- Can apply front and back, tamper-evident or wraparound labels to flat (no orientation), and/or oval products (orientation needed).

No format parts for different containers required.

- Continuous labels magazine available for non-stop production.
