

Hot Glue Roll-fed Labeling Machine ZRPP-01 Series

ZRPP-01 Series rotary OPP hot melt glue roll-fed labeler with glue roller has possessed worldwide patent technology of Razor cut. (roll-fed labeling machine with inner cutter drum) Adopting world modern spray technology (Nordson of America) the controllable glue nozzle accurately and directly sprays hot melt glue to the leading and trailing adage of label via glue roller and then finish labeling. The advance system of transporting and controlling make applying label be more flat and precision. The labeler also has much advantage such as, reliable running roller, accurate sticking label, perfect glue pattern and low glue consumption.

Number of Heads: 6,9,12,15,18,24,30. Design base on the customers' requirement.

Capacity: 3000-40,000 b/h.

Limit Capacity: 110-120%.

Pattern of Container: 50-120mm for cylindrical, square containers.

Pattern of Label: Max. 220mm.

Label Consumption: <0.5%

Machine with Conveyor Belt: 1900-4150mm.

Voltage: 380±10%V 50Hz (Special requirement for information)

Air Pressure: 0.6MPa.
