

Full-Automatic Piston-Type Filling Machine HP-6N

Product Description:

1. This machine has six filling head, driven by a six cylinder, filling the material more quickly and accurately
2. Using German FESTO, Taiwan Air Tac pneumatic components and electronic control parts of Taiwan, stable performance
3. Material contact parts are made with 316L stainless steel
4. With Korea Photonics eye device, Taiwan PLC, touch screen, inverters and electrical components in France
5. Adjustment facilities, no bottle no filling, precise filling volume, and with counting function
6. With anti-drip filling and drawing the bulkhead, anti-foam products, filling high-lift system to ensure that the bottle top positioning system and liquid control systems.

Technical Parameters:

Model	HP-6N
Speed	60-100 Bottles/min
Filling Accuracy	$\leq \pm 1\%$
Voltage	220/110V, 50/60Hz
Air Pressure	0.4-0.6MPa
Current	3A
Power	500W
Model	5-60ml, 10-125ml, 25-250ml, 50-500ml, 100-1000ml
