

## *MK 102 Small VFFS Packaging Machine*

The MK-102 is an automatic small vertical form fill seal packaging (VFFS) machine designed to package liquid and semi-viscous products. This machine uses volumetric piston dosing system and is integrated with continuous type sealing system to produce 3 side sealed and 4 side sealed pouches / bags.

Adding to its versatility, the 100 series can be integrated with most filler for granules, liquids, pastes, sticky powders, snacks and food grains etc.

### **Application:**

Free flowing fluids and semi viscous liquids products like Shampoo, oil, liquor, vodka, gin, water, agricultural liquid, tomato ketchup etc.

### **Features:**

- Robust, compact and easy to maintain
- Lowest power consumption requires single phase power only
- Easy to operate hence no need of skilled labor
- All contact parts of SS food grade

### **Technical Specifications:**

<b>Filling range:</b>	1 to 100 ml
<b>Output Speed:</b>	up to 25 PPM
<b>Packaging Material:</b>	Any heat sealable film, laminated film in roll stock
<b>Bag Size:</b>	W: 30 to 150mm, L: 40 to 200 mm
