

MIC-R45 Plastic & Laminated Tube Filling And Sealing Machine

This machine is mainly used for Plastic & Laminated tube filling and sealing.

It has been widely used in the fields of Pharmacy, cosmetic, food and chemical etc.

This machine function is:

1. Automatic tube loading
2. Automatic benchmarking (Cursor positioning)
3. Automatic tube filling sealing & No tube no filling
4. Automatic heating sealing (Inner & Outer heating)
5. Material hopper can heating and stirring
6. Automatic printing the batch dates code
7. Automatic cut the over part after sealing then output finish product
8. Can update with European accessories like Siemens, Omron and Schneider etc.

This machine is suitable for filling, sealing, printing and cutting of plastic tubes of various specifications. The shape of the sealing tail is beautiful and neat, the sealing is firm, the measuring accuracy is high, and the stability is good. According to customer material viscosity could be heating and stirring hopper and diving filling system.

PARAMETER

Voltage	110V/220V/380V
Power	1.1kw
Heating Power	400w*2
Air Pressure	0.6-0.8Mpa
Production Capacity	25-45 tubes/min
Filling Volume	1-300ml
Filling Error	±0.5g
Material	SS304/316
Dimensions	1500*700*1800mm
Weight	475KG
