

## *FJG Series Powder Separate-Filling Machine*

Mainly used for antibiotics bottles of sterile powder drugs of partial shipments and jump the queue.

### **Performance characteristics**

The machine adopts servo motor control screw rotation and divide the way automatically complete stoppering, unscramble bottle, into the bottle, repacking, Richard plug, jump the queue processes.

### **Technical parameters:**

- To adapt to the specification: 5-25 ML bottle antibiotics
- Production capacity: 100 ~ 300 PCS/min
- Packaging range: 0.2-1.5 g
- This divide: 2
- Stoppering: 16 broken down
- The capacity: 2.5 KW
- Net weight: 1500 KG
- Overall size: 2650×1580×1850 mm
