

## *Small Automatic Capsule Filling Machine NJP-400C*

NJP-400C automatic capsule filler processes the products for optimal productivity up to 400 capsules per minutes, featuring low-maintenance operation, minimal downtime, and overall dependable production.

Powder dosing uses the 3 stage tamping technology for an enhanced accuracy. Filling of pellets is available.

Capsules from the bunker are fed into the orienting device along the vertical guide.

Then they are transferred into special cells on the rotor. Here the capsule is separated, after what the bottom part comes to the filling position.

After filling the bottom part with the material, on next positions the non-separated capsules are rejected, and the filled bottom parts are joined with top parts, counted and taken away into the receiving box.

### **Specifications:**

| <b>Machine Model</b>         | <b>NJP-400C</b>           |
|------------------------------|---------------------------|
| <b>Max capacity</b>          | 24000 capsules/hour       |
| <b>Suit for capsule size</b> | 00#-5# and safety capsule |
| <b>No.of mould bores</b>     | 3                         |
| <b>Machine dimensions</b>    | 750x700x1700mm            |
| <b>Net weight</b>            | 700kg                     |
| <b>Power</b>                 | 380/220v, 50/60Hz, 6kw    |
| <b>Noise</b>                 | <75dB                     |
