

## Fully Auto Capsule Filling Machine HX-3200/3500/3800

HX-3200/3500/3800 full automatic capsule filling machines are new products which based on original technology and absorb the advantages of similar products in the world and developed by ourselves. The machine has the characteristics of large output, accurate filling dose, good adaptability for medications and hollow capsule, stable operation, high automation degree etc.

### Main Features:

- this model is an intermittent motion and hole plate type full automatic capsule filling equipment, fully closed in filling and rotary parts, easy to clean
- upper and lower die assemblies move one-way, the imported double-lip polyurethane sealing ring making good sealing performance
- assemblies cleaning station with the air blowing and sucking function to protect the hole module without any powder under the high working condition
- locking station has the powder sucking function
- finished capsule station with the card capsule circle device, no powder flying
- the dosing disk is made of copper, increased rub resistance, not deformed easily

### Technical Parameter:

Model	HX-3200	HX-3500	HX-3800
Output	3200 Capsules/min	3500 Capsules/min	3800 Capsules/min
Filling dosage	Powder, Pellet		
No.of segment bores	23 25 27		
Power Supply	380V 50Hz 3P		
Capsule Size	00#-4#capsule		
Filling error	±3%—±4%		
Noise	≤78dB(A)		
Making rate	Empty capsule 99.9% Full capsule over 99.5		
Machine Dimensions	1850*1470*2080mm		
Machine Weight	2400kg
