

Multi Head Tube Filling Machine

Precisely engineered using high quality raw material, this machine is used to fill viscous products like paste, ointment, jars etc. in very small containers.

Technical Data:

Machine Dimension	1200x2100x1850
Tube diameter	12.5mm to 50mm
Machine weight	900kg
Power Requirement	9kw
Air requirement	6kg
Chilled water requirement	5°C chilled water
Filling volume	3gms to 250gms
Machine construction	SS304
Filling Construction	SS316
Machine Speed	60 to 80 tubes/minute
