

Semi-Automatic Aluminum Tube Filling and Sealing Machine

Mainly used for packaging materials with aluminum tubes. This machine is widely used in packaging in the pharmaceutical, daily chemical, food, chemical and other industries. Such as ointment, toothpaste, epoxy glue, 502 glue, hair dye, and other liquid or paste-like materials filling and sealing.

Product Parameter:

Equipment name	Semi-automatic aluminum tube filling and sealing machine
Production speed	10-40 pcs/min (depending on different materials and filling volume)
Filling range	10-200ml
Applicable tube height	80-180mm
Applicable pipe diameter (diameter)	20-35mm
Number of stations	16个
Voltage	220V
Air pressure	4-6Mpa
Equipment weight	220KG
Equipment size	1140mm*600mm*1580mm
