

Top And Bottom Automatic Labelling Machine

Top and Bottom Sides Automatic Labelling Machine is suitable for label lesser height of square, round, and flat bottles in the industry of foodstuff, medicine, cosmetic and so on. This machine the function is advance, easy operation, structure compact. Adopt to photo electricity examine, PLC control, Touch screen software operation, conveyor belt, nip bottle belt are all stepless for speed adjust, label nicety; at the same time it has the function of no object no labelling, no label can revise by itself, and automatic to check. This machine can using single label, and also can using with other packing machinery for automatic produce on line.

Technical Parameters:

Labeling accuracy	±1mm (excluding products, labels, error)
Apply the product size	Length: 40-400mm Width: 40-200mm Thickness: 0.2-120 mm (Can be customized)
Applicable to the power supply	220V/50HZ (Need to add a voltage converter, according to the local voltage of different country)
Apply labels outside diameter	Φ 240mm
Power consumption	700W
Net weight	About 400Kg
Labeling speed	40–80 pcs/min (related to the product and label size)
Apply label size	Length: 6-150mm; Width: 15-130 mm (Can be customized)
Apply labels inside diameter	Φ 76mm
Voltage	220V
Net size (L*W*H)	Machine size: 1980*730*1420 mm Packing size: 2050*850*1500mm
