

## *Shrinking Packaging Machinery L-Bar Sealing WX-350X*

Automatic L-Bar Sealing and Shrinking Packing Machine is suitable for shrink packing of any items. It's formed by units of automatic cutting and sealing, heat circulating shrink stove. This composition reduces labor cost and raises production efficiency.

1. The machine adopts the most advanced PLC programmable controller, with safety protection and alarm devices, while the sealing system can have a continuous sealing order without replacement; Maintenance is very simple;
2. Feeding length controls through a combination of electric eye detection and time relay to control precise film length that makes it easier to control the contraction effect;
3. Two groups of horizontal and vertical electric eyes are easy to switch for thin or small packages which can easily complete sealing packaging operations;
4. Automatic rolling waste material : Using a separate motor to control which is not too loose or too tight to crack and is easy to remove the waste
5. It has automatic blowing function;
6. Front in feeding power conveyor and back non-power storage table can be selected as your demands.

### **Installation and adjusting:**

Factory will adjust the machine to best working status before delivery. Factory offer adjusting and installing video to custom and offer on-line technical support due to the Virus affecting.

## Specifications

<b>Model</b>	<b>WX-350X</b>
Max Packing Size	450mm×350mm×120mm (L*W*H)
Min Packing Size	100mm×60mm×5mm (L*W*H)
Machine Size	6000mm×935mm×1615mm (L*W*H)
Maximum mechanical speed	0-30 metre/min
Power	14KW
