

Dry Powder Blender Machine W-1000

This machine adopts inside and outside rotary stirring, high uniformity. Mixing bucket can be tilted at any Angle to facilitate discharging and cleaning needs. With automatic timing device, can be set 0~60 minutes automatic stop. Using stainless steel butterfly valve discharge, no dust leakage and flying phenomenon. Using the principle of gravity diffusion mixing, the pressure feed to the material is small, will not produce shear crushing of the material.

Technical Parameters:

- Model No.: W-1000
- Application: Powder, Medicine Processing, Chemicals Processing, Food Processing
- Max. loading volume: 600L
- Range of spindle speed: 1-12rpm
- Weight: 810kg
- Voltage: 220V/380V/415V/440V
- Dimension(L*W*H): 2765*1500*2370mm
