

Ribbon Blender Powder Mixer WLDH-1500

Main Application The Mixer Machine is composed of U - shaped container, spiral stirring blade and transmission parts. Spiral blade is generally made of two layers, the outer spiral material from both sides to the middle of the collection, the inner spiral material from the middle to both sides of the transmission, the formation of convective mixing. This Mixing Machine is generally used for the mixing of viscous or cohesive powder particles and the mixing of liquid and paste materials.

Technical Parameters:

- Model: WLDH-1500
- Application: Medicine Processing, Chemicals Processing, Food Processing
- Max. Loading Volume (L): 900L
- Weight (KG): 1800 KG
- Dimension(L*W*H): 3180*1020*1550mm
