

## *Tube Filling Sealing Machine HJ-FN*

The machine can automatically orientate eye marks, filling, sealing, pressing date and cutting the end. This machine is widely used in daily cosmetic, medicine and food industries.

### **Features:**

A reliable thermo-air heating system composes of high efficient heater and stable flow meter imported from Germany are applied. It adopts PLC control, automatically tube feeding and positioning, filling sealing and date printing, cutting end function. The filling heads in different specifications are prepared for materials in different thickness.

## Technical Parameters:

Product name	Inner heating type filling and sealing machine
Product capacity	30-80 tubes/min
Filling volume	2-250ml
Tube diameter	10-55mm
Tube length	50-220mm
Filling accuracy	$\leq \pm 0.5\%$
Sealing heating type	Inner heating
Work air pressure	0.6Mpa
Size	L2270*W960*H2100mm
Weight	500kg
Vacuum pump	0.4kw
Power Supply	50Hz/380V 3P
Main motor power	1.5kw
Heating sealing power	3kw
Material	Stainless steel
