

JLB Automatic Horizontal Round Container Labelling Machine

Application

The machine is designed by giени specially using for long tube bottle which can't stand steadily, such as lip balm, lipstick, roundness container mascara and sun stick products.

Optional Configuration

- Coding machine
- Transparent label detection optoelectronic switch
- Automatic container in feed mechanism

Features

- PLC with human-machine interface, intuitive operation, simple and clear.
- The machine is made of stainless steel and aluminum alloy which cannot rust and meet GMP.
- The machine has the function of leading positive, dividing bottles, fitting, making label smooth and counting.
- The location of label can adjust conveniently.
- Can connect conveyor.
- Can make all kinds of special models according to the requirement of customer.

Technical Parameters

Voltage&Power	AC220V,1P,50/60HZ,600W
Labelling speed	0-25m/min
Presicion	±0.1cm (except the error between pasted thing and label)
Bottle dia	1-2.5cm (special dimension can be customized)
Bottle height	2.5-10cm (special dimension can be customized)
Label width	1-12cm (special dimension can be customized)
Label roll dia	Scroll inner diameter: 7.6cm, outer dia. :35cm
Outer dimension	200x78x155cm
