

Automatic Cap Sealing Machine CC-1102

The Automatic Cap Sealing Machine is designed for automatic filling medicine into bottle (small volume) and cap sealing, such as Chinese herbs powder, dry syrup powder and aerosol powder etc.

Features:

- This machine provides powder filling, plug insertion and cap sealing functions.
- Bottles and cans are introduced by conveyor belt combined with indexing drives star wheel table.
- There is a photo sensor for bottle detection to achieve a goal of Bottle-Fill and No-Bottle-No-Fill.
- Automatic bottles / cans positioning and elevation, and vibratory filling.
- Employ Japan SMC air cylinder.
- The machine does not run in case of no air supply or insufficient air pressure.

Specification:

Model	CC-1102
Machine Size	L300xW87x210 cm
Machine Weight	950kgs
Power	220V,3Ø,2.5HP,50/60Hz
Range of Filling and Metering	1-30g
Filling Speed	15 - 35 bottles (cans) / min (Vary with capacity)
Air Pressure	5-6kg/cm ²
