

Automatic Rotary Cold Glue Paper Labeling Machine ZT-08

Characteristic

Automatic Rotary Cold Glue Paper Labeling Machine applies to label on bottle, glass bottles and metal cylinder-type container. ZT08 labeling machines for conventional containers, its high degree of unrestricted. Labelling material should be paper labels, conventional printing is ok. Tags are available for casein glue or chemical composite glue. ZT08 of the key components of all are used by imported original pieces. The size of similar containers and labels, ZT08 does not need replace parts, only needs a little adjustments to their production

Main configuration

Model	ZT-08
Diameter of container	40—110mm
Material of label	paper
Speed of labeling	100bottle/min
Glue	Water-soluble glue(cold glue)
Glue coating ways	along label length directions , every 5 mm, there is a glue road.
Power situation	three phase ,380V
Power	0.75kw
Air resource	0.4Mpa 100L/Min
Size of the machine	2400mm×760mm×1200mm
Weight	750kgs
