

RXC Series Full Automatic Plastic Cup Production Line

The line is formed of Cup Making Machine and cup stacking machine. Using the plastic-sheet heating to a certain temperature after pressing the hear-sheet, many kinds of cup products can be made by the Cup Making Machine, for example, the soft-drink cup, milk cup, jelly cup, ice-cream cup and disposable cup. The come-out cups go to the Stacker for Automatic Stacking. The machine is controlled by PLC, using the Touching-Screen, and servo motor used in the Sheet-Feeding Device and Pulling Device. This line has the advantage of manpower saved and low cost in production. The line is high in automatic production level, has fast speed in it. The automatic stacking of the cups can be done by itself. Not pollution of the environment and a wide range of uses. Material: PP PS PVC&PET

Power	95KW
Range of sheet	Thickness:0.4-1.6mm(PP、PS、PVC、PET)
Sheet Width	500-660mm
Forming Area (Max.)	600×400mm
Forming Depth (Max.)	160mm
Speed	20-30cycle/min
Air Consumption	3m ³ /min (0.6-0.8Mpa)
Range of stacking	Cup Diameter>60mm, height: Diameter>1.2
Dimension	11×1.5×3.5m
Weight	About 8T

额定功率	95KW
适用片材	厚度0.4-1.6mm(PP、PS、PVC、PET)
片材宽度	500-660mm
最大成型面积	600×400mm
最大成型深度	160mm
生产效率	20-30次/分(可调)
耗气量	0.6-0.8Mpa 3m ³ /分(外接气源)
叠杯范围	口径>60mm, 杯高/口径>1.2
外形尺寸	11×1.5×3.5m
总重量	约8吨
