

Automatic Liquid Packaging Machine HP1000L-III

This machine is widely used to pack liquid of low and high viscosity such as pure water, milk Juice, beverages, soy sauce, vinegar and wine. It can automatically sterilize the film with violer ray, form the bag, print the code precisely, fill the product and seal cut at one time. Model HP1000L-I and HP1000-II used single lay PE film and co extrusion film and the HP1000L-111, HP1000L-B used printed laminated film such as PET/PE, OPP/PE, to present more attractive packing.

Technical Parameters:

Model	HP1000L-III
Output	1000BAGS/HOUR
Capacity	200-1000ML
Power	1.4KW 220VAC/380VAC
Size	1050×850×1850mm
Weight	430kg
Film widh	240/320mm
