

## *SP-18 Inner and Outer Bag Packing Machine*

### **Performance characteristics:**

1. The bag making system adopts stepper motor subdivision technology, which has high precision in bag making and the error is less than 1mm;
2. Using a temperature controller, so that the sealing quality is higher;
3. Touch screen operation allows you to set the bag length without changing parts. Can be pre-counted; display packaging speed, bag length, etc.
4. Using pneumatic bag, bag, seal, tangent, etc. with the machine, stable and reliable performance;
5. Using PLC / touch screen programming control, so that more stable performance, simpler operation, more humane;
6. All parts in contact with the material are stainless steel.

### **Scope of application:**

Tea, Chinese medicine, coffee and other bubble bags.

### **Optional accessories:**

Date coder, product conveyor.

### **Packaging Materials:**

- Tea bag: Heat-sealable filter tissue paper.
- Label: Paper Plastic Compound
- Outsourcing: Composite film materials.

**Technical Parameters:**

<b>Model</b>	<b>XY-18</b>
Packing capacity	1-5g
Inner bag size	55-80×47-70mm
Outer bag packing size	75-100×60-90mm
Production capacity	30-45 bags/min
Label size	20×20mm
Line length	160mm
Power Supply and Power	220V 50/60Hz 2.8Kw
Equipment shape	L1800×W600×H1800(mm)
Equipment weight	650Kg
