

DZ-900 Large Chamber Vacuum Packaging Machine

This machine is a large chamber vacuum packing machine. It is suitable for electronic products, chemical products, food, seafood and so on.

Features:

- This machine is well designed with full function and stability. The sealing is very strong.
- It can finish vacuum and sealing automatically.
- The vacuum degree can be adjusted to make a better package.
- The microcontroller can make the sealing time accuracy to 0.1 second.
- Large vacuum chamber design can pack large products such as large fish and meat.

Large Chamber Vacuum Packing:

This machine is a large chamber vacuum packing machine. It is ideal equipment for electronic products, chemical products, food, seafood and so on.

Technical Data:

Machine Model	DZ-900
Voltage	380V / 50Hz
Power	2.0KW
Weight	150kg
Sealing Length	500mm×2
Sealing Width	10mm
Dimensions	1130×660×850mm
Maximum Vacuum	≤-0.1MPa
Chamber	900×500×100mm
