

Automatic Powder Packing Machine DXDF Series

Automatic vertical filling and packing machine for hard-bulk solids and powders DXDF series uses high-precision dosing system auger. As a heat-sealable packaging material used composite materials, such as paper / PE, Cellophane / PE, aluminum foil / PE, BOPP / PE, Nylon / PE, etc.

Volume dosing is determined by the number of screw rotations. Ask proportion can start using the PLC-controller. It is easy to change the dose weight and other parameters of the machine.

Application:

Automatic vertical filling and closing machine series DXDF used for packing hard-bulk products in the food, chemical, medical and other industries.
