

Food Metal Detector Machine High Sensitivity Detection LD-100/150/200/250/300

Application:

Apply to detect metal leakage (such as iron, copper, lead, stainless steel, etc) fallen in material and goods, and automatically.

Food metal detector for food industry, bakery industry, fruits, candy, cookies, etc.

Kindly Reminder:

We have experienced team of R & D engineers who can customize packaging solutions according to your product characteristics.

Description:

- Analog design is combined with digital design. greatly improving reliability and intelligence.
- Adopt new touch screen input and large scale integrated circuit CPU collects analog signal.
- Adopt the set of user-friendly interface. ensuring that the entire operation is simple, human.
- Seen at a glance and all commands can be done by operating the interface.
- Dynamically and visually display the dynamic test results of Fe and SUS, the sensitivity of current automatically.
