

TCDF Powder Material Packaging Machine (Type A-without valve pocket)

Mainly applicable to powder material (flour, bran, starch, feed, chemical powder etc.) similar materials.

Main features:

1. Adopted by a fast, medium, slow feeding mode. AD processing technology of high speed, anti-interference technology, automatic error correction and compensation technology, accurate measurement, stable and reliable performance.
2. With reasonable structure design, low energy consumption, energy saving and consumption reducing function.
3. Different ways will be used for feeding and structure applying according to different materials in order to ensure that the measurement is accurate, stable and reliable.
4. Using lift-down bag structure to make sure that the bags can be fallen vertically on the conveyor, and it can be improved the working environment effectively.
5. There have some functions of the weight display, cumulative bags, working status and intelligent processing of fault.

Technical Parameters:

Specifications	TCDF10	TCDF25	TCDF50
Weighing range(kg)	5-10	20-25	25-50
Yield (packets/h)	100-300	100-240	100-200
Dividing value(g)	5	10	10
Accuracy	OIMR61*(0.2)	OIMR61*(0.2)	OIMR61*(0.2)
