

TY1969-2 Double-head Rotary Filling And Twisting Machine

Machine features:

1. Double-head Rotary Filling And Twisting Machine is designed for small capacity and irregular-shape bottles, accurate mold positioning and filling;
2. rapid filling speed, satisfying the customers who have many products and frequently change product models; very easy to clean;
3. suitable for all kinds of lotion, milk, cream, oil products.
4. high filling accuracy, $\pm 1\%$ deviation, two independent servo motor control, independent adjustment to capacity;
5. quick cap screwing speed, adjustable torque of cap screwing, cap- positioning function of the pump head;

Applicable bottle type:

Round bottles, square bottles, plastic bottles, glass bottles, porcelain bottles, etc.

Technical Parameter:

- Machine model:TY1969-2
- Working voltage and power:220V AC 50Hz 2KW
- Length, width and height:184.5 * 120 * 171 cm
- Weight:400 kg
- Head: double head
- Filling speed:40-50 bottles/minute
- Filling capacity 30-200 ml
- Material:304/316 / stainless steel
