

Water Filling Machine/Water Filling Production Line XGF-series

Description:

This Water Filling Machine is used to bottle pure water and mineral water. This machine is integrated with washing, filling and capping in one machine. It takes bottle handling technology, which makes changing different size bottle more easily. It can do the bottles from size 200ml to 2000ml. And little spares are need when changing bottles. We suggest users to take same specification bottles, especially the same bottle neck. Our mono-bloc uses high quality stainless steel 304, which makes sure the quality of the products. The washing we take reversing bottle methods. It has so many washing heads which will spray the inside of the bottle after the bottle is reversed. After washing there will approximate 2 seconds dropping water. Capping we use magnetic capper. And capping power can be adjusted. We equip the machine with "No-bottle, No-Cap" system. If there is no bottle, the caps feeding will be stopped. The capper feeder is stand beside the mono-bloc, which is parallel to the machine.

Technical Parameters:

Model	XGF16-12-6	XGF18-18-6	XGF24-24-8	XGF32-32-10
Heads of washing, filling, capping	16-12-6	18-18-6	24-24-8	32-32-10
Production capacity(b/h)	2000-4000	5000-7000	8000-12000	12000-15000
Suitable bottle diameter(mm)	$\phi=50-110\text{mm}$ H=170-310mm (Volume: 250-2000ml)			
Main Motor power	4.4kw	5.2kw	6.2kw	6.2kw
Overall dimension (L x W x H)	2230×1630×2250	2600×1965×2250	2900×2200×2250	3880×2200×2250
Weight	2500	3500	4200	6000
