

Z520 Combined Weighing Type Full Automatic Particle Packing Machine

Z520 combined weighing type full automatic particle packing machine has two kinds: carbon steel type and stainless steel type to meet customer's various needs. Z520 full automatic particle packing machine can automatically complete material upper feeding, weighing, packing and conveying. This combined weighing packing machine includes:

1. Vertical packaging machine
2. 10 electronic scales
3. Working platform
4. Automatic hoist
5. Product conveyor

Suitable material all kinds of disintegrated granules and bulk materials. Such as puffed food, potato chips, dumplings, dumplings, ice, pet food, biscuits, candy, dried fruit, food, seeds, tea, chicken, monosodium glutamate, salt, hardware parts.

Technical parameters:

- Bag making: Length: 80-400mm; width:80-250mm
- Max width of roll film: 260-520mm
- Packing speed: 5-65 bags/min
- Measuring range: 150-1200ml
- Air consumption: 0.65mpa
- Gas consumption: 0.3m³/min
- Power voltage: 220VAC/50Hz
- Power: 3.5KW
- Dimension 2000Lx2000Wx3500H mm
- Weight: 1500Kg
