

GZJ120 Tube Filling Machine

GZJ120 Tube Filling Machine is a newly developed striped toothpaste filling machine. It is facilitated with complete controlling and detecting system, whose parts are of the best in market, with good performance and high stability. This machine can be used for produce tri-color and bi-color toothpaste, as well as normal toothpaste. While producing striped toothpaste, the proportion of colored toothpaste and main toothpaste can be adjusted conveniently according to requirement within a certain range, with stable and good looking stripes. This machine is a good choice for enhancing product competitiveness.

Specifications:

Type	GZJ120
Capacity(pcs/min)	120
Power(kW)	3.7
Tube Diameter(mm)	13-40
Tube Length(mm)	60~200
Dosing Volume(ml)	1.5-350
Compressed air(MPa)	0.6
Weight(kg)	3820
Dimension(mm)	3150x1560x2270
