

XSHB2-5 Automatic Mixer packing machine

The machine is composed of volumetric conveying cups, vibration device and convey. The volumetric conveying cups are used to convey and measure free flowing products like beans, powdered soup, salt etc. The bowl vibrating feeders are used to convey irregular products like lump meats, dried shrimps and so on. The bucket conveyers are used to fill multi-products into one bag

Technical Parameters:

Model	XSHB2-5
Production capacity (bags / min)	40-60
Volume margin (ml)	20-100
Bag size (mm)	L 50-180 W 50-120
Power Voltage (V)	380V 3-Phase and 4-wire system
Power Consumption (W)	1120 (heating180×4)
