

JINRONG MACHINERY

QGF series 5 Gallon Water Filling Machine

QGF series 5 gallon water filling machine is composed of washing, filling & capping into one body especially for the production of drinking water of 3 and 5 gallons, it's an ideal filling line to produce mineral water, distilled water and pure water. The 5 gallon water filling line is made of superior stainless steel, anti-corrosive and easy to clean. Siemens electrical components are adopted as main components. The world famous product of AIRTAC and Omron are introduced in the air circuit systems. The 5 gallon water filling machine is compactly conformed to small occupation of space, high efficiency, reliable, stable quality and high automation.

Technical Parameter:

| Model | Capacity | Filling heads | Power | Water consumption | Air consumption | Overall dimensions (L*W*H) | Weight |
|---------|----------|---------------|---------|-------------------|-------------------------|----------------------------|---------|
| QGF-60 | 60B/H | 1 | 1.88 Kw | 0.6 T/H | 0.18m ³ /min | 2700*1200*1600 mm | 400 kg |
| QGF-120 | 120B/H | 1 | 1.88 Kw | 0.6 T/H | 0.18m ³ /min | 3900*1200*1700 mm | 600 kg |
| QGF-300 | 300B/H | 2 | 5 Kw | 2 T/H | 0.4 m ³ /min | 5900*2300*1880 mm | 2500 kg |
| QGF-450 | 450B/H | 3 | 7 Kw | 2 T/H | 0.4 m ³ /min | 6000*2600*1880 mm | 4000 kg |
| QGF-600 | 600B/H | 4 | 10 Kw | 2 T/H | 0.4 m ³ /min | 6600*2800*1880 mm | 4500 kg |
| QGF-900 | 900B/H | 6 | 20 Kw | 2 T/H | 0.5 m ³ /min | 7400*3200*1880 mm | 5000 kg |
