

Induction Cap Sealing Machine Multi - Pack-2000

Multipack is one of the market leading producers, manufacturers, exporters and suppliers for installation of high quality online induction heat sealing machine and carona treater machines suitable for bottle, Jar, jerry can, oil, phamra, food and cosmetic bottle.

We manufacture the induction cap sealing machines in very high tech environment at our Ahmedabad based plant. With years of experience, today we have all types of designing and manufacturing skill to produce best quality induction cap sealers following the international standards in our production centers.

Induction cap sealer machine gives sealing flexibility from 20mm to 120mm diameter caps without changing any part.

Multipack-2000 is a compact mobile induction sealer system with all in one featuring the latest logic control cards and easy power regulation.

You can also take the benefits of our expertise in custom built sealing heads and 'tunnel Head' for specific applications, high speed sealing and unusual closure designs.

Physical Design Features:

- Compact all-in-one design: Easily Movable: The machine is mounted on a wheel based water-cooling unit which provides mobility. Easy for line relocation.
- Single Body, "on conveyor" mounting system.
- Front panel with easy to use membrane switches.

Specification

SUPPLIES	200-240V, 10AMP SINGLE PHASE ELECTRICITY (50HZ)
Output Power	2Kw / Multi -Pack-2000
Net Wt. / Packed Wt	100kg / 170kg
Dimension (W x D x H)	760 mm x 600 mm x 1670 mm
Cap Size	20mm to 120mm
Max. Line Speed	50 feet / minute
MOC	AL / MS
